Gérard Chalhoub (LIMOS)
Olivier Coupelon (Almerys)
Pascal Lafourcade (LIMOS)
Michel Misson (LIMOS)
Olivier Reynaud (LIMOS)
Sébastien Salva (LIMOS)

The Symposium on Digital Trust in Auvergne is a scientific gathering that aims at exchanging and discussing the current and future needs for trusting the digital environment. The digital information is invading our everyday life at a fast rate and what we used to do using solid objects is now made possible using digital technology. Security issues related to dematerialized documents, money, identities, transactions, etc. will be exposed by researchers. Industrials are also invited to be part of this event and to present their current solutions and future trends in the digital trust domain.

The topics include, but are not limited to:

- Network Security
- Security Protocols
- Security of Communications
- Security Models
- Formal Methods for security
- Software Security
- Digital Identity
- Authentication
- Trust and Privacy
- Security Policies
- Cryptographic Algorithms
- Intrusion detection

Authors are invited to submit a 1-page abstract written in English. Both original and previously published work are welcome. Manuscripts should comply with standard LNCS conference template for LaTeX or Microsoft Word (check the website for templates). All accepted abstract will be available on the symposium website.

Technical Program Committee

Cédric Bouhours (LIMOS)
Gérard Chalhoub (LIMOS)
Pascal Lafourcade (LIMOS)
Michel Misson (LIMOS)
Olivier Reynaud (LIMOS)
Sébastien Salva (LIMOS)

Submission deadline: October 13, 2014
Notification of acceptance: November 3, 2014

Camera-ready version: November 17, 2014
